---

**LANGUAGES:** Ruby, Rails, Javascript, HTML5

**CSS:** CSS3, Sass, Bootstrap

**FRAMEWORKS/LIBRARIES:** AngularJS, JQuery

**DATABASE/STORAGE:** Postgres, Firebase

**ADDITIONAL SKILLS:** Windows Subsystem for Linux, Git, GitHub, Responsive Sites, Visual Studio Code

## EDUCATION

---

### Web Development - Bloc.io (2018)

A self-driven online bootcamp that focuses on remote collaboration, JavaScript, Bootstrap, AngularJS,, and Ruby on Rails.

While I studied at Bloc i received mentorship from multiple industry experts and built six projects. The six projects I built covered HTML, CSS3, Bootstrap, JavaScript, AngularJS, Firebase, Ruby on Rails, and Heroku.

## PROJECTS

---

### Shoff Accounting Client App - <http://www.mattmusser.com/sa-client-app.html>

- Built with Ruby on rails and bootstrap.
- Used the ActiveAdmin gem to give the client an Admin dashboard and tools to add/remove clients and add links to the respective client's financial spreadsheets.
- Using the Devise gem clients are able to log in to access their financial reports.

### Omniwiki - <http://www.mattmusser.com/omniwiki.html>

- A wiki encyclopedia or wikis built with Ruby on Rails utilizing a variety of gems including Device, Pundit, Stripe, and Redcarpet.
- Users are able to create, edit, and view wikis.
- In order for users to create private wikis and collaborators, they can purchase a premium account.

### PostEnvy - <http://www.mattmusser.com/postenvy.html>

- A Reddit replica built to teach the fundamentals of web development and Rails.
- Users can create accounts using Gravatars as profile pics.
- Users can create topics, posts, and comment on posts.
- Users can also favorite posts to keep track of their favorite ones.
- Users also can vote on posts which show the popularity of posts.

## EMPLOYMENT

---

### Target

Flow Team Member · May 2011 to Feb 2018 · Opelika, Al
